Note: Table compiled by COWS (Center on Wisconsin Strategy) from the 2014 Farm Fresh Atlas for Central Wisconsin. To be included in the atlas, farms pledge that they are cooperatively or family-owned, and operate in a way that reduces the application of synthetic pesticides and fertilizers, protects land and water resources, and treats animals with care. Farm Fresh Atlas farms must also provide safe, fair working conditions for employees, and sell products grown or produced in Wisconsin.
