"It's about more than a building."

The Tribune Building Project goes beyond residents determining the building's end use. It represents inclusion, hope and unlimited potential – inviting everyone to participate, influence decision-making, and shape our shared future.

Join us September 19 to hear results from the 2016 Tribune Participation Survey and celebrate the impact of the Tribune process.

Madeleine Beaubien Taylor, PhD, survey designer and CEO of Network Impact, will share key findings from the survey. Residents will have the opportunity to offer their experiences and discuss the results. All are welcome, whether you have participated in Tribune meetings prior or if this will be your first.
